TIPS

50000 series 3 piece thrust bearings are listed in this catalogue for convenience. These items are not always available through us.

We do offer some thrust bearings in stainless steel or full ceramic. Refer to the material as listed in the size charts.

Banded thrust bearings are a semi-precision type of bearing. You will often find these in jockey wheels and other slow rotating systems.

3 piece thrust bearings often have a clearance bore on one side and a clearance OD on the other. These features allow the bearing to operate in a system without a stepped shaft or housing. If the bearing ID is identical on both sides, then the shaft will need to be stepped. If the bearing OD is identical on both sides, the housing bore will need to be stepped.
