Brands

MBA products are sourced from many factories worldwide. The original factory brand will not be shown because we may substitute one quality manufacturer's product for another so long as the products both meet the required specifications. Country of origin is available in a datasheet that may be requested by email, but it should be noted that most of the major brands that we source have factories in many countries, and the country indicated on the datasheet may vary from time to time

An exception to the above is when we specify a "brand" as part of our part number (eg, [608-2RS-MC3-NSK](#)). In such cases, the item offered will be the brand stated in the part number.

The brands shown below are a sample of the factories that we use, however we do regularly source from over 100 manufacturers.

With respect to **bearing brands** offered...

- European Bearings are usually either WIB, Myonic, RMB or GRW.
- USA Bearings are usually NHBB or MPB (Timken).
- Japanese Bearings are usually ISC, NSK, NTN, EZO, NACHI or KOYO
- Bearings sourced from factories with no brand have the designation "-ECO" at the end of the part number.

Bearings and other parts with a part number containing the suffix "ECO" are not marketed as MBA Brand. These parts are sourced from non-mainstream factories and are provided primarily for use in hobby and non-critical applications.
